

PhoneTop® EDU Application Suite

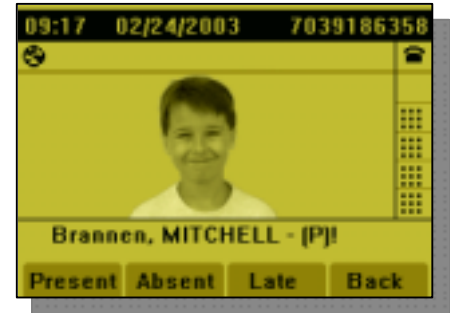

Go Beyond Dial Tone™

MAKE THE SMART CHOICE IN IP TELEPHONY SOLUTIONS

Now, you can take advantage of the power of IP telephony technology (which allows quality voice traffic to travel on your data network) in an easy-to-use solution designed specifically for educational environments. AAC's PhoneTop® EDU employs industry-standard Cisco Systems® IP telephony equipment that will help your school or Local Education Authority:

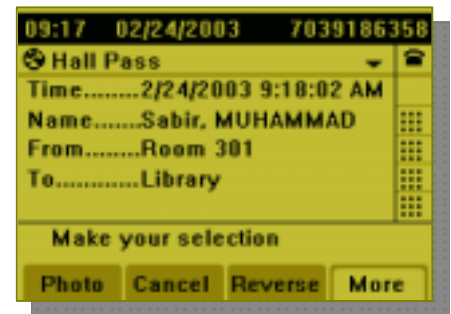

INCREASE TEACHER PRODUCTIVITY

Simply press one button to mark a student "Present," "Absent," or "Late." PhoneTop EDU automatically integrates with your school's database to check for authorized absences and early dismissals. Is there an unexcused absence? PhoneTop EDU can even be set up to automatically send parents truancy notices via email.

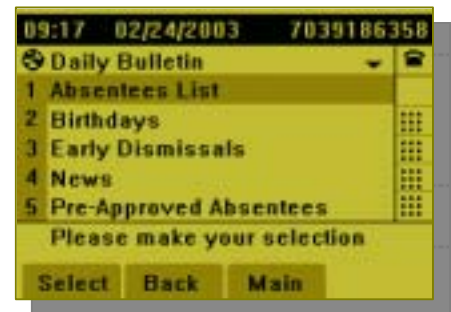

INCREASE FACILITY SECURITY

Now you can record facial identities and increase security measures with PhoneTop EDU. Visitors can have their pictures taken and automatically distributed to all the phones on campus. Students can be issued electronic hall passes—complete with pictures—allowing security personnel to track of who is where in the school.

RECEIVE INFORMATION FROM OTHER SCHOOL RESOURCES

Daily alerts are issued regarding today's absentees, early dismissals, late students, pre-approved absentees, supply teacher assignments, special events and bulletins. Even student birthdays are included.

Go Beyond Dial Tone.

OH, AND MAKE PHONE CALLS, TOO!

Not only does the phone offer a variety of applications, but it also increases security and parent-teacher communications by providing a line to the outside world. A powerful phonebook function makes sure your calls get through – whether you dial by job title (such as “Head Teacher” or “Lesson Support Assistant”), or by last name.

ABOUT AAC INC.

Incorporated in 1983, AAC provides network engineering consulting services for U.S. Federal, state and local government, and commercial clients. AAC boasts three areas of expert specialization: IP Communications, Information Assurance and Application Development. AAC is a Cisco Systems IP Telephony specialized Partner, Cisco IP Communications Development Partner, and Cisco AVVID Partner, providing value-added, customized Voice-over-IP solutions to our customers. This includes the integration of 3rd-Party, Eco-System Partner products as well as the development and integration of AAC XML, C, and JAVA applications such as the PhoneTop® application described herein. Please visit <http://www.phonetop.com> or call toll-free 010-1-877-FONE-TOP (010-1-877-366-3867) and ask for sales for more information.

AAC's European Representative is ESI (Empowering School Improvement). Contact ESI by ringing Mr. Bob Lewis at 044208 941 9669 or, via email at:
